Adjustable Cabinet Legs

Simplified cabinet construction for efficient
production and installation

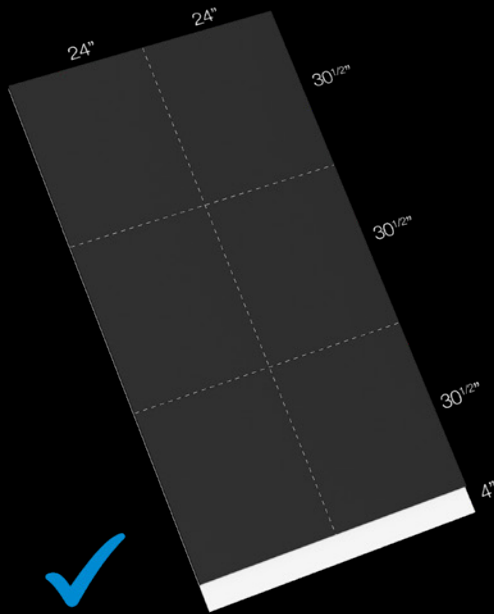

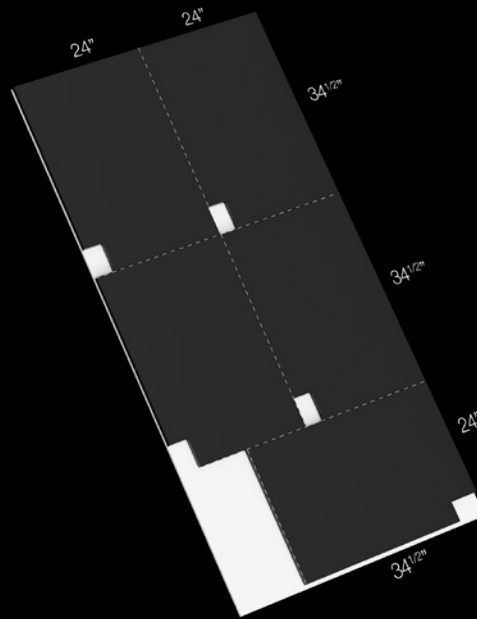

A better foundation for cabinet manufacturing and installation

Adjustable cabinet legs provide an efficient alternative to traditional toe-kick cut-outs, helping manufacturers simplify cabinet construction. By replacing complex cut-out panels with a legs-based design, cabinet production can be standardised, streamlined and adapted across a wide range of cabinetry applications.

For installers, the system enables fast positioning, precise levelling and easier access for plumbing and electrical routing. The result is a more efficient process from manufacturing through to final installation, delivering consistent results and long-term cabinet performance.

With legs - 6 Panels

Traditional - 5 Panels

Optimized cabinet design

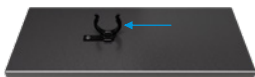

- Simplifies end-panel construction and reduces production complexity
- Maximizes material yield
- Improves manufacturing consistency

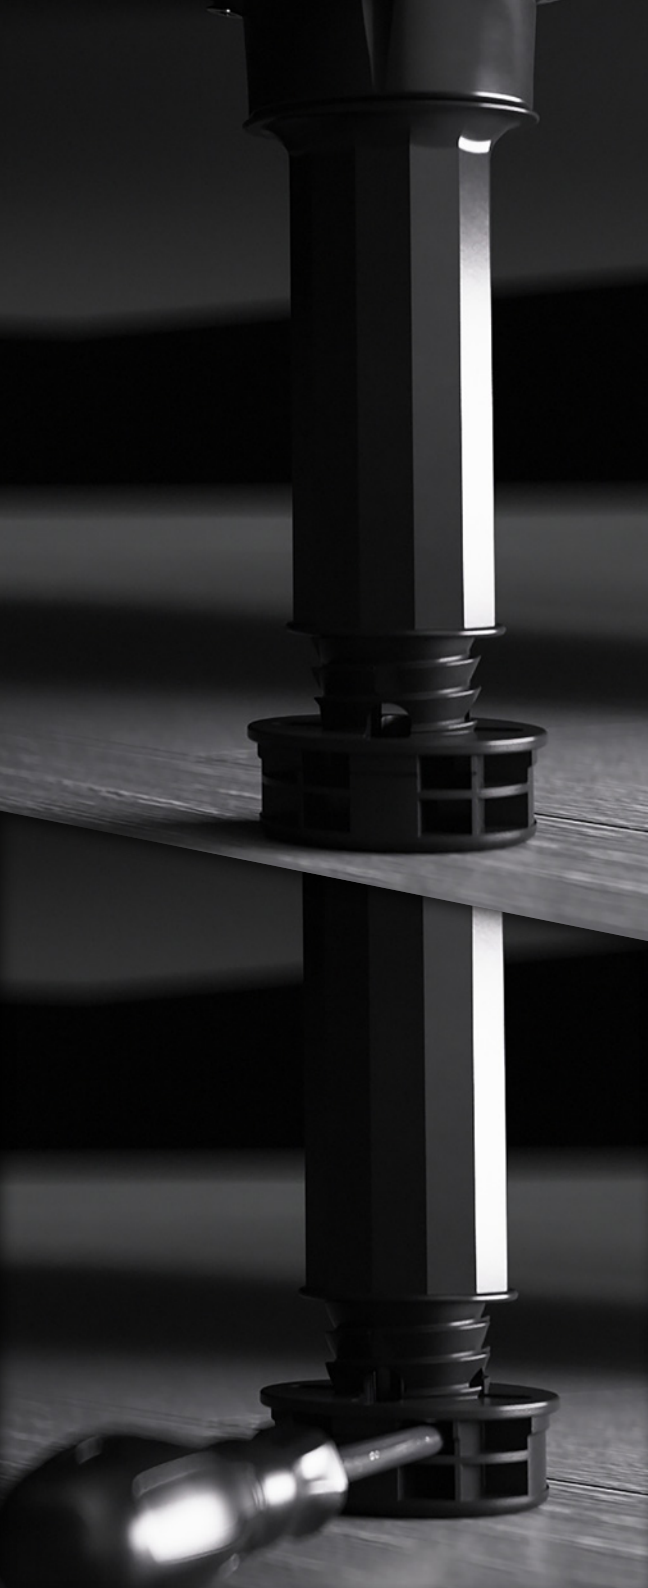

Fast and secure installation

- Fast height adjustment
- Adjustment by hand or screwdriver
- Accurate cabinet alignment

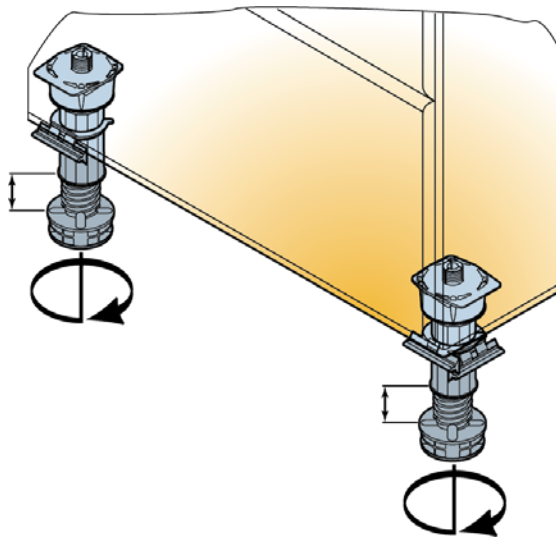

Toe-kick mounting

Precise levelling

- Fast height adjustment
- Adjustment by hand or screwdriver
- Accurate cabinet alignment

Long-term cabinet protection

- Protects cabinet edges during handling and installation
- Helps prevent damage from spills and moisture
- Simplifies plumbing and electrical routing

Technical details and system range

Legs, sockets, toe-kick clips and accessories for efficient cabinet manufacturing and installation.

- Simplified cabinet construction
- Fast and easy assembly
- Precise on-site leveling
- Supports up to 800 lbs per leg

Adjustable cabinet legs

Multiple height options

- H = 60–90mm (2 3/8"–3 1/2")
- H = 92.5–150mm (3 5/8"–5 7/8")
- H = 125–185mm (4 7/8"–7 1/4")
- Load capacity up to 800 lbs per leg

Socket range

Mounting solutions for various applications:

- 10mm knock-in socket
- 15mm expansion dowel socket
- Screw-mount socket

Toe-kick clips

Fast toe-kick attachment and removal

- Screw-in and groove-mount options
- Flexible positioning
- Reversible for corner applications

Accessories

Add-on 50mm leg extension for increased cabinet height
