System 6

Engineered for fast, easy
cabinet assembly

Why Choose System 6?

Designed to simplify production and speed installation, from the factory floor to the jobsite.

System 6 is engineered for closet systems, storage furniture, and modular shelving, delivering faster assembly, installation flexibility, and strong, reliable connections. Its face-boring design simplifies production while helping manufacturers achieve consistent results.

Fast assembly with Quickfit technology

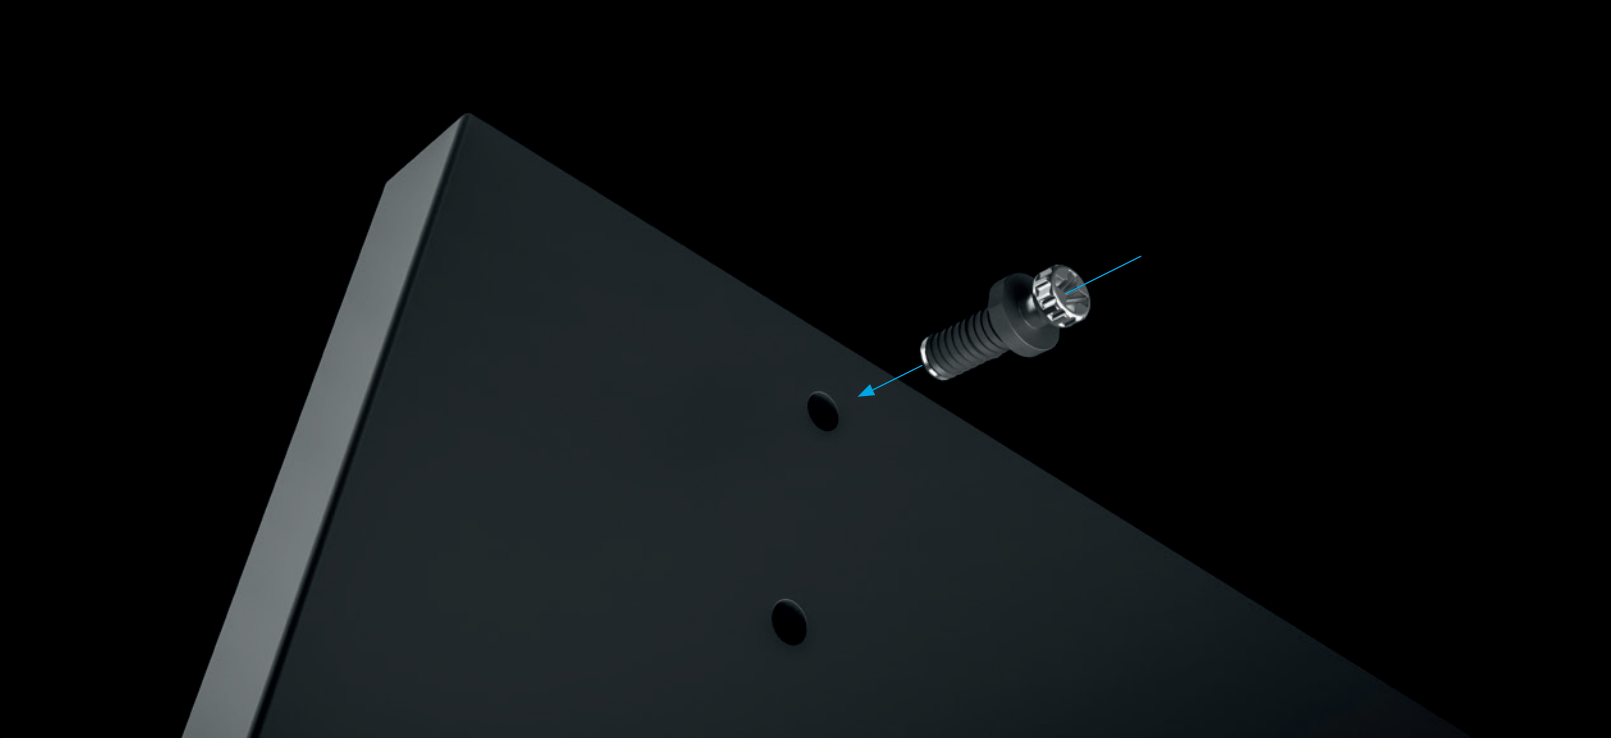

Easy Tightening in Hard-to-Reach Areas

Fast, accurate positioning

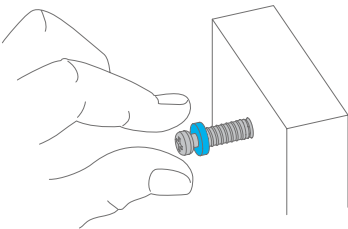

Strong, secure joints that last

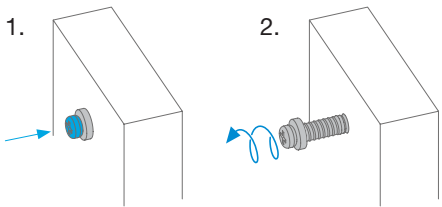

Fast assembly with Quickfit technology

- Tool-free dowel insertion
- Reliable connection with an expanding dowel sleeve, that securely grips the hole when tightened
- Easy removal without damaging the panel surface

Dowel insertion

Dowel removal

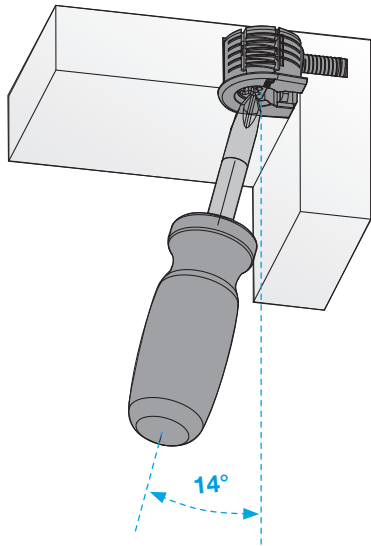

1. Push the dowel head in
2. Unscrew

Easy Tightening in Hard-to-Reach Areas

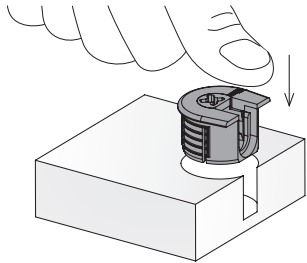

Powered by the Angledriv™ feature

- Easy to drive at an angle of up to 14°
- Creates a strong, secure joint

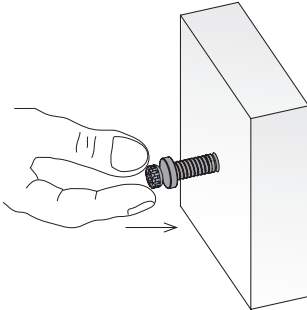

Mounting & Assembly

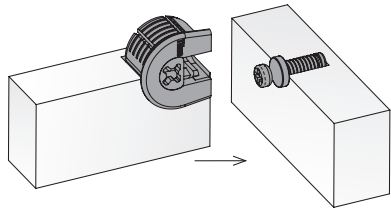

1. Press the housing into face board

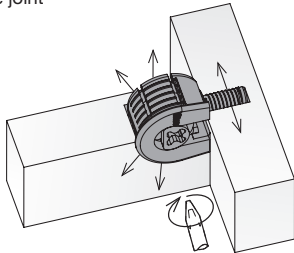

2. Press the dowel into side panel

3. Assemble the panels

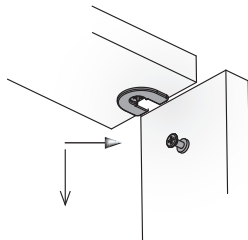

4. Tighten the joint

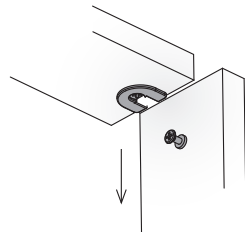

Side-entry

- Allows installation from the top or side, making it ideal for applications with limited top access

Drop-on

- Top-down installation holds panels securely in position before tightening, enabling faster and easier one-person assembly

Range

System 6 flush

- Flat head sits flush with the panel surface
- Ideal for efficient transport of flat-pack closet systems
- All-white cams help reduce installation errors
- Third-party stickers available to match panel colors

System 6 Outrigger

- The added extension simplifies installation and provides a stronger grip between the cam and the panel

Wedgex

- Structural shelf support for increased cabinet strength and stability
- Enables tool-free shelf repositioning while helping prevent accidental removal

Dowels

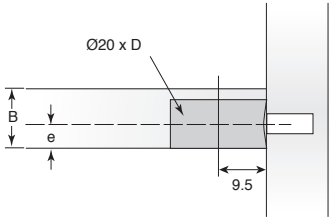

- Quickfit dowels for tool-free insertion
- Screw-in dowels
- End and double-ended dowels
