September 2025

## Simply Titus. Engineering You Can Trust. Meet us at SICAM 2025, Hall 2, Stand B44/C45

At SICAM 2025, Titus will present solutions that bring clarity to complexity – making furniture assembly easier, faster, and consistently reliable. Guided by our **Consumer Assembly Friendliness (CAF) philosophy**, every innovation is designed for effortless installation, intuitive use, and repeatable performance. By simplifying processes and improving efficiency, our precision-engineered components enable manufacturers to optimise production, reduce costs, and strengthen competitiveness. Simply Titus: purposeful engineering that enhances reliability and delivers long-term value.

### SICAM 2025 Highlights

#### Expansion of the T-type Family

Expanding the T-type hinge family, the new **T-type PressTo** introduces tool-free hinge cup fixing, enabling effortless and quick installation with a simple press-in action. With an audible click confirming secure attachment, it ensures confident and repeatable assembly, reducing installation time and enhancing productivity. This evolution, paired with the **3Way snap-on hinge-to-plate mounting**, sets a new standard for quick and reliable cabinet assembly.

Also featured in the T-type range is **T-type Noir**, a trendy dark finish that combines discreet aesthetics with premium functionality.

The range also includes **T-type-i 170°**, a wide-angle hinge designed specifically for tall doors. It offers exceptional stability and a zero-protrusion opening angle, making it ideal for interior drawer applications.

## Push Latch S2: Handleless Made Better

Titus **Push Latch S2** is our push-opening system for handleless cabinet doors. Designed to meet the growing demand for sleek, minimalistic furniture without handles, Push Latch S2 ensures a smooth, silent, and bounceless opening action combined with a confident, reliable close.

By integrating a damping system, Push Latch S2 overcomes the common drawbacks of traditional push latches – eliminating noisy, sudden door opening and uncertain closing. Its safety detachment feature, depth adjustment for precise alignment, and easy, tool-free mounting make it a reliable solution for manufacturers and homeowners alike.

## Innovative Connection Technology: Quickfit TL5 ‘Full Metal Jacket’ and System 6.2

The **Quickfit TL5 ‘Full Metal Jacket’** dowel is the only high-performance solution engineered to reliably engage in 5mm dowel holes. This innovative technology ensures a strong and durable joint in MDF, chipboard, and solid wood while offering **tool-free insertion** for faster cabinet assembly.

Complementing this, **System 6.2** introduces a next-generation **square-shaped** connector, providing **enhanced stability, easy knock-in insertion, and a contemporary aesthetic** that aligns with modern furniture designs. Perfectly suited for modular closet systems, walk-in wardrobes, and shelving units, System 6.2 offers a robust and stylish solution tailored to the evolving needs of modern interior spaces.

## Tekform Slimline+ Drawer: Precision Meets Performance

The **Slimline+ drawer system** represents the latest evolution in effortless drawer installation and adjustment. Compatible with the **Tacto push-to-open system**, the Slimline+ drawer fits perfectly with contemporary handleless drawer trends.

Slimline+ features a **colour-coded adjustment panel** positioned at the front, providing easy and intuitive access for quick and accurate fine-tuning. The panel incorporates a **three-dimensional front adjustment mechanism**, ensuring precise alignment and enhanced user convenience.

## Damping Technology: ART of Damping Across All Conditions

Titus continues to lead in precision-engineered damping solutions, delivering smooth, controlled motion across diverse applications. At the core of this innovation is **Adaptive Response Technology (ART)**, which fine-tunes damper performance by **automatically adjusting to door weight and closing speed**. This ensures consistent, rebound-free motion, prevents slamming, reduces wear, and extends product lifespan.

- **Effortless operation:** Low opening force makes doors and drawers easy to open.
- **Versatile application:** A single ART damper adapts to various door weights.
- **Extended durability:** Protects components, ensuring long-term reliability.

By dynamically responding to movement, ART embodies Simply Titus – removing complexity and ensuring effortless, precise motion control.

Titus' latest damping advancements further reinforce this philosophy:

- **Cold/hot applications:** Reliable damping from -30°C to 150°C, ideal for home appliances, automotive, and commercial interiors.
- **Slidix range:** Advanced soft-close solutions for sliding doors, delivering silent, controlled operation across multiple applications.
- **Multi-purpose push-to-open technology:** Enhancing handleless furniture with consistent performance and an effortless user experience.

With ART and cutting-edge damping innovations, **Titus ensures that motion is always smooth, predictable, and engineered for excellence.**

### Slidix: Customisable Soft Closing Solutions for Sliding Doors

**Slidix** is a comprehensive range of high-performance soft-closing solutions designed for a wide variety of internal sliding door applications, including wardrobes, closets, shower doors, and barn doors. Engineered for smooth, controlled, and silent movement, Slidix ensures a premium user experience across both sliding and pocket door systems.

At the heart of Slidix is **Titus damping technology**, which enables the damper to adjust to different door weights and closing speeds. This ensures consistent, reliable performance and allows manufacturers to apply a single Slidix system across a broad range of door designs. The result is greater efficiency, reduced complexity, and lasting value – engineered for purpose.

### PushTrio for Pocket Doors: Push-to-Open and Soft-Close in One

**PushTrio** is a compact mechanism that combines push-to-open and soft-closing functions in a single unit for interior pocket sliding doors. A light push releases the door smoothly, while integrated damping ensures controlled, silent motion in both opening and closing directions.

Unlike standard systems, PushTrio allows doors to retract fully into the wall, leaving the passageway completely clear. With its modular design, it offers versatile solutions for modern, handle-free interiors where comfort, safety, and simplicity matter most.

## Cabinet Assembly Technology: Faster, Stronger, and More Reliable Solutions

At SICAM 2025, Titus is also showcasing technologies that enhance furniture manufacturing, making assembly quicker and more reliable.

**Titusonic®** is transforming cabinet assembly by utilising ultrasound welding instead of traditional adhesives, creating a stronger, more durable bond while verifying structural integrity in real time.

**FastFit** supports the RTA industry by streamlining factory pre-insertion of Quickfit dowels, ensuring faster assembly, improved CAF scores, and enhanced consumer satisfaction.

These innovations reflect our commitment to **efficiency, precision, and reliability** – helping manufacturers **optimise** their processes and deliver **superior products**.

### Simply Titus – Engineering You Can Trust

At SICAM 2025, Titus showcases its commitment to simplicity, efficiency, and reliability in furniture manufacturing – true to its promise, **Engineered for Purpose**. Every solution is designed for intuitive assembly, consistent performance, and lasting value.

Visitors will see how Titus turns complexity into clarity with products that are smartly engineered, easy to install, and built to endure.

### Titus Group

Titus Group, the UK-owned company, develops, manufactures, and markets innovative precision component solutions that improve competitiveness of its customers in various industries. Through innovative product design, high-volume manufacturing expertise and efficient service it enables business partners to improve their productivity and quality, and reduce costs of assembly, manufacturing, and other processes. The majority of the Company's turnover comes from its core activity, the production of furniture connectors, concealed hinges, and furniture damping. The precision engineering competence gained in the field of furniture hardware has been applied to other areas: multi-purpose damping technology, automated assembly systems, precision die casting and ultrasound fastening technology in various industries such as furniture, home appliances, automotive, medical devices and hardware.
