RV Push Locks

Reliable and secure locking of
cabinets for recreational vehicles

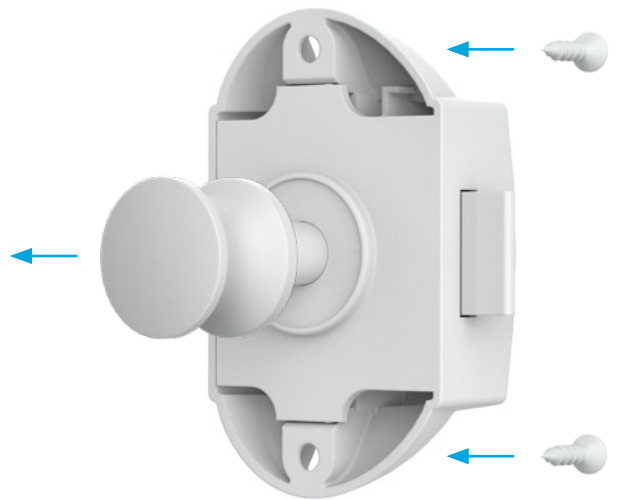

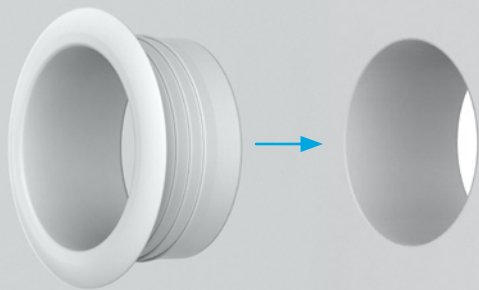

Secure locking of cabinets while travelling

Titus provides a range of solutions to securely lock cabinets during travelling for a comfortable journey. Our easy-to-mount push locks feature push-in opening and closing, allowing seamless integration with existing interior designs.

With over 30 years of development and manufacturing experience, our product range includes traditional Push Locks and Mini Locks, complemented by various rosettes and knobs, including a recently developed squared design. Our latest innovations consist of:

- self-locking mechanisms Magnet Lock and Bistabil Lock
- a universal Push Latch RV with a push-to-open function for a contemporary look of cabinets without handles

Secure locking of cabinets during travel

Effortless push-in opening and closing

Easy and intuitive mounting

Reliable and consistent

RV Push Locks

Titus push locks provide secure closing of cabinets in recreational vehicles, boats and yachts, giving the user a mind-free travelling experience.

The mechanisms are designed to assure consistent and reliable functioning throughout the product lifetime. With only a light push on the knob, they can be effortlessly and comfortably opened and closed. A non-handed lock design assures intuitive mounting regardless of the position on the door.

Our push-locking mechanisms can be mounted on door's thickness of 13mm, 16mm and 19mm, in a combination with a wide range of rosettes and knobs, enhancing the sleek look of any RV interior.

Push Lock

Safe and reliable

- Secure locking of cabinets up to 40kg
- A wide range of rosettes and knobs that can be combined to fit door thicknesses of 13mm, 16mm, and 19mm
- Sturdy design for reliable functioning throughout the product lifetime
- Also available as Espagnolette Lock for application on taller doors and wider drawers.
- Works without handles

Push Lock Mini

Compact and light

- Designed for efficient utilisation of space
- Compatibility with small or medium rosette assures optimal comfort and flexibility in use
- Locking and holding force up to 40kg

Magnet Lock

Mechanism with integrated magnetic closure

- Instant self-locking of cabinets
- Reliable and silent functioning
- Compact size minimizes protrusion in the cabinet interior
- Ensures self-locking of cabinets with damped and non-damped hinges
- 25kg locking strength

Magnet Lock is used in combination with a handle.

Bistabil Lock

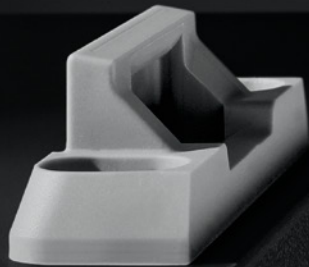

Intuitive 2-way opening lock

- Unlocking from both directions by pressing on the Bistabil handle
- Follows Titus One-for-All principle - can cover all door thicknesses from 13mm to 19mm
- Instant self-locking of the cabinet with magnet
- Ensures self-locking of cabinets with damped and non-damped hinges
- 25kg locking strength

Push Latch RV

Push to open

Universal push-opening mechanism for cabinets without handles

- Effortless push opening
- Secure and comfortable locking
- Door-to-side panel gap adjustment
- Mounted at the centre of the door, it enables intuitive push opening from any point on the cabinet door
- 25kg locking strenght
