Functional Hardware for Closet Systems

Engineered for easy assembly and reliable performance

Titus hardware can help you create customized closet solutions that are easy to install and reliable in performance. Discover the practical advantages of our innovative hardware and see how we can make a difference in your closet designs.

Our closet fittings, including connectors, concealed hinges, and shelf supports, are designed with precision to ensure durability and consistency in performance. They are tailored for easy installation, making them ideal for manufacturers, distributors, and designers looking for efficient and dependable closet solutions that seamlessly blend with various closet designs.

Optimize your storage space and add to its functionality with Titus hardware!

**Ribs on housing for
reliable cam positioning**

Efficient flush design

**Fast assembly with
toolless Quickfit dowel**

**Comfortable tightening
with 'Angledriv' feature**

System 6 Flush

Connectors for efficient transportation and easy assembly

Flush design

The System 6 Flush connector with its flat head forms an even surface when it is inserted into the board. It is an excellent and efficient way to flat pack your closet systems, minimizing panel damage during transportation.

Quickfit dowel

Pairing the System 6 Flush cam with the Quickfit dowel offers the fastest, easiest home installation. The dowel expands securely when tightened and can be removed without damaging the panel, allowing flexible panel positioning.

Drop-on mounting for easy assembly

The drop-on design simplifies installation, allowing one-person assembly for walk-in closets, garage storage, and shelving units. This method boosts efficiency, cuts labor costs, and enables easy panel repositioning before final tightening.

Side-entry mounting

Ideal for confined spaces like built-in wardrobes, side-entry mounting allows assembly from both the top and side, providing greater flexibility. It reduces disassembly needs during adjustments, saving time and enhancing convenience.

More on System 6 Flush:

**Strong and reliable joint in MDF,
solid wood and chipboard**

**Toolless insertion technology
for 5mm dowel holes**

High drilling tolerances

Designed for factory insertion

Be efficient in closet manufacturing

Quickfit TL5 'Full Metal Jacket'

High-performance dowel with
great resistance to dowel pull-out

The Quickfit TL5 'Full Metal Jacket' connector provides strength and reliability with toolless insertion technology. Its expanding steel sleeve ensures robust connections in MDF, solid wood, and chipboard, offering high resistance to dowel pull-out, ideal for durable closet assembly.

Tool-free insertion technology

Quickfit TL5 is the only tool-free Quickfit dowel that reliably engages 5mm holes, allowing toolless insertion for various RTA furniture applications. This feature streamlines the assembly process, making closet installation faster.

Designed for factory insertion

When used with the Titus FastFit insertion machine, the Quickfit TL5 can be pre-inserted, cutting assembly time by 50%. Automating connector insertion enhances efficiency and consistency, improving Customer Assembly Friendliness (CAF) and saving time and money for manufacturers, retailers, and consumers.

One-for-all

**Reliable hinge-to-door
attachment**

3Way snap-on

Strong and highly tolerant

T-type

Strength and durability for
lifelong consistent performance

The T-type concealed hinge portfolio offers comprehensive solutions for closet door applications, ensuring seamless functionality, reliable performance, and aesthetic appeal for modern designs.

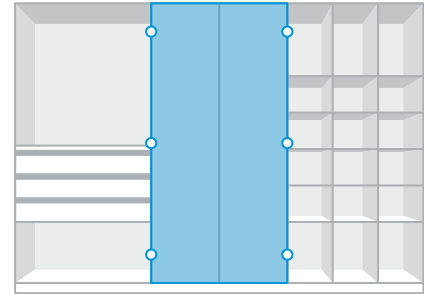

T-type hinges deliver consistent performance throughout the closet's lifetime. The **3Way snap-on** feature saves time during assembly, allowing quick and secure attachment of the door in three directions, and is ideal for easily clipping multiple hinges on large doors that are frequently used in closets. With the **Titus Damper Inside**, available integrated or as an add-on, the T-type ensures **ConfidentClose**, a customer-preferred soft closing.

Versatile closet solutions

Our T-type hinges with 9mm cranking are optimal for half-overlay designs, popular for shared panels. The T-type is also available for full overlay, inset doors, and angled doors, accommodating various closet door applications.

T-type PressTo

The T-type PressTo features a toolless hinge cup fixing system for quick and easy mounting. Locking the hinge cup requires minimal effort, with an audible click to indicate secure attachment. This efficient mechanism accelerates installation while retaining all the benefits of the T-type, making it ideal for both DIY enthusiasts and professional installers.

More on T-type:

**Reliable and consistent damping
with Titus Damper Inside**

**Full accessibility
into the storage space**

**Zero protrusion for unobstructed
pull-out of internal drawers**

**Strong and tolerant design
for lifetime consistent performance**

Enables internal drawer systems in your closet

T-type-i 170

Wide-angle hinge for interior drawer application

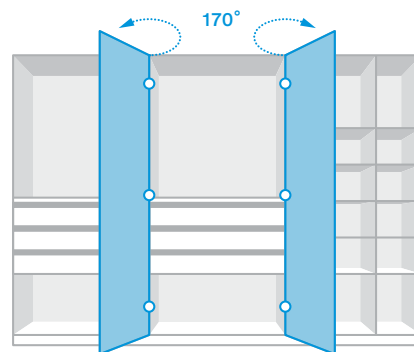

Integrated damping

The T-type-i 170 is our wide-angle hinge that offers greater access with its wider opening angle and integrated soft-closing technology.

Zero protrusion

A key feature of this hinge is its zero protrusion into cabinet space, ensuring smooth and unobstructed operation of internal drawers.

Being part of the T-type hinge family, this hinge retains all the key features, like 3Way snap-on hinge-to-plate mounting for easy assembly, and ConfidentClose for reliable soft closing.

More on T-type:

Convenience of handleless closets

Soft and silent

Safety detachment

Depth adjustment

**Compatible with damped
and non-damped hinges**

Push Latch S2

Soft and silent push opening for handleless doors

Smooth performance

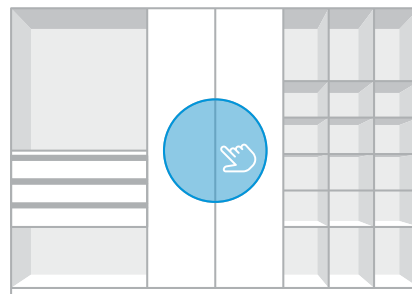

Push Latch S2 is a push opening mechanism that features a damping system for soft, silent, and bounceless door opening. The door closing is confident, reliable, and always right the first time.

Intuitive mounting

The positioning lip ensures accurate placement on the cabinet for intuitive mounting. The safety detachment feature allows easy reattachment if accidentally hit.

Consistent push opening

This mechanism is compatible with both damped and non-damped self-closing hinges and fits standard drilling patterns. The non-removable depth adjustment button ensures an optimal door-to-side panel gap for consistent performance.

More on Push Latch S2:

Adjustable cabinet legs and plinth clips

Our adjustable cabinet legs fit all plinth heights, ensuring optimal alignment. They attach easily with a push-on mechanism and support up to 800 lbs per leg. The plinth clips come in a spring design that fits any plinth position without drilling and a screw-in version for variable positions. The reversible plinth is ideal for corners, offering flexibility and ease of installation.

Accessories

A range of closet accessories designed for easy installation and enhanced closet stability

Shelf supports

Our shelf support accommodates various shelf thicknesses, featuring retainer mechanisms for added security and pads for metal supports with glass shelves. Available in nickel and Noir finishes, our products align with current furniture colour trends and are compatible with panel thicknesses of 16mm and 19mm, offering versatility for closet applications.

Shelf Q-Peg

The new Shelf Q-Peg combines robust technical properties with an elegant, minimalist appearance. It installs easily without tools, using a rock-in pin to anchor securely into cabinet sides and shelf holes. The square-shaped design provides a sleek look and seamlessly integrates with modern furniture lines, emphasizing a minimalist aesthetic.

Noir

An elegant dark colour finish

In response to the increasing demand for dark cabinet and closet designs, Noir provides a visually appealing solution. This elegant dark finish seamlessly matches any cabinet design, regardless of colour and surface structure.

Wide range

Noir is available for our popular T-type hinges and a variety of other fittings, including push latches, shelf supports, and joining plates. Its uniform, discreet surface enhances furniture designs across bedrooms, kitchens, living rooms, bathrooms, and offices. Noir reduces hardware prominence, offering seamless integration and boosting the overall aesthetic appeal of furniture.
