# High Performance Quickfit Dowel for Multiple Wooden Materials

## **Quickfit TL5** **‘Full Metal Jacket’**

- Effective in multiple wooden materials
- Strong and reliable joint
- High drilling tolerances
- Tool-free insertion

# Quickfit TL5 'Full Metal Jacket'

## High Performance Quickfit Dowel for Multiple Wooden Materials

**Effective performance in chipboard, solid wood and MDF**

Optimal strength and effective performance in MDF, chipboard and solid wood, without the use of wooden dowels

**Strong and reliable joint**

An expanding steel sleeve assures high resistance to torsion and dowel pull-out

A rigid cabinet construction which doesn't loosen through time, even at repeatable assembly

**High drilling tolerances**

An extended dowel head form works as a positive stop against cam and provides an ETHC tolerance of min. +/-1mm

ETHC=edge-to-hole centre

Fully tightened joint even at marginal inconsistencies of drilling and problems associated with the natural movement of wood panels

**Tool-free insertion  
for 5mm dowel holes**

Quickfit TL5 reliably engages the 5mm dowel hole

It enables the usage of tool-less Quickfit dowel insertion technology across a wide range of applications

**50% less time to assemble  
the cabinet at home**

When edge inserted the dowel engages the cam and remains securely positioned until the boards are locked together

For maximum efficiency, the insertion process can be automated using Lama FastFit machine

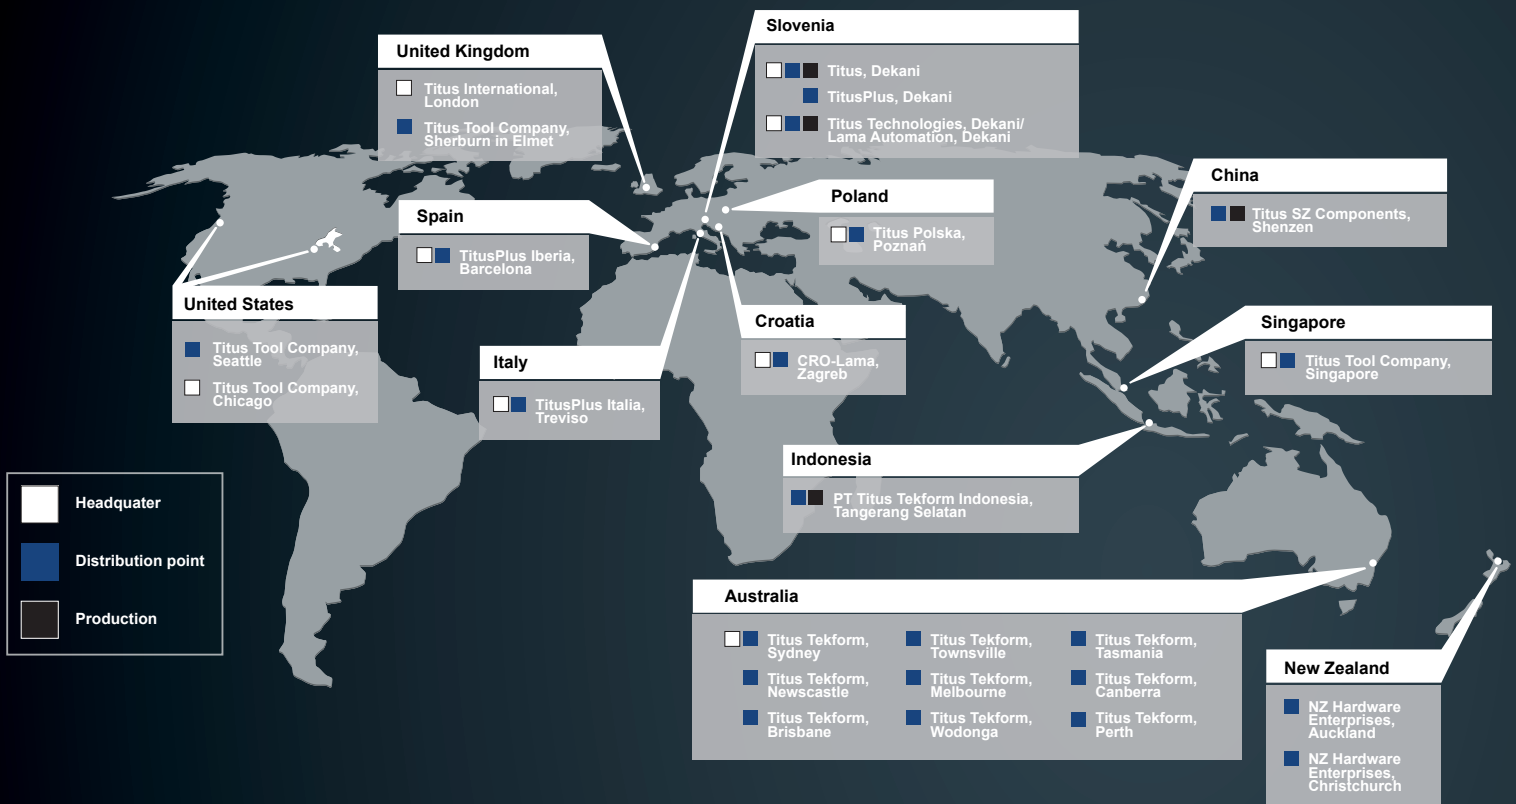

Fast and easy furniture assembly  
at home

**Technical and  
mounting details**

Hole diameter	5mm
Length ETHC (edge-to hole- centre) -A	24mm, 34mm
Insertion type	tool-free only
Application	manual insertion, factory insertion
Cams	works only with Cam5000
Drilling specification	Hole diameter (face board) = Ø5mm Hole depth = min. 12.5mm Hole diameter (edge board) = Ø8mm
